DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Species I in Paper No. 4 is acknowledged.

The traversal is on the ground(s) that the restriction was improper because of a PCT application filed on this same invention. The examiner acknowledges that he did not do a restriction under 371, and provides a corrected restriction under 35 U.S.C. 371. The examiner believes the original restriction is substantially the same as the 371 restriction.

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I, Fig. 2.

Species II, Fig. 9.

Species III, Fig 13.

Species IV, Fig 16.

Species V, Fig 18.

Species VI, Fig 19.

Species VII, Fig 20.

Species VIII, Fig 21.

Species IV, Fig 22.

Species X, Fig 23.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The following claim(s) are deemed to be generic: None.
3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Multiple embodiments are shown in the specification and in the drawings as referenced above.
